## SUMMARY

Experienced Java Full Stack Developer and Cloud Engineer with in-depth expertise in AWS and Google Cloud Technologies. Proficient in Java technologies and frameworks, leveraging cloud platforms for streamlined application development. Additionally, brings graphic design experience, enriching the skill set

## EXPERIENCE

Intern

February 2023 - March 2023

RedHill Softec

Bangalore

- My skills in NodeJS, JavaScript, HTML5, CSS, SQL, and Spring Boot, along with the knowledge of different dependencies helped me.
- I created robust web applications. Additionally, using Angular for hosting demonstrates my ability to develop dynamic front-end.
- Leveraging this stack, I possess the foundation to build full-stack applications that combine seamless functionality with UI.

## PROJECTS

Java Full-Stack Development [TRI GER]

March 2023- April 2023

- With Java full stack development I created a robust and effective way to develop a web application for buying electronics equipment.
- On the frontend, modern JavaScript frameworks like Angular can deliver a smooth user experience and enhance the application's interactivity.
- This application will enable customers to browse and purchase products with ease
- Overall, Java full stack development is an excellent choice for building a high-performance web application that meets the needs of modern e-commerce.

Mobile application development [HireNow]

February 2022- April 2022

- To develop an android application using android studio and to experience the UI and UX seamless.
- Developed mobile application for hiring and booking domestic workers using Android Studio tools.
- Increased user engagement by 40% and improved user experience with the help of analytics tools.

Database project on defense[DPDS]

September 2021 - December 2021

- Created table to store defense expenditure in database.
- To manage defense company data I created many tables and connected it to front-end for updating it when needed.
- Developed a local database based project using MongoDB to store military defense expenditure..

## EDUCATION

Bachelor of Engineering

Computer Science and Engineering  
Visvesvaraya Technological University (VTU) Belgaum  
2023 7.2 CGPA

SDM PU College

Minor in PCMB • DepartmentOf Pre- University Education  
Bangalore 2017 69%

Beena VaidyaInternational Public School

Karnataka Secondary Education Examination Board  
Bangalore 2016 84%

## CERTIFICATIONS

AWS Certified Solutions Architect Associate SAA-CO3

<http://ude.my/UC-8a113973-00cf-40e7-98b9-c0de13581f42>  
I gained Experience with AWS and Cloud Services, REST API Development, Mobile Application Experience particularly for iOS and Android platforms, Networking and Security Skills such as DNS, HTTP, SSL, SMTP, and TCP

Architecting with Google Kubernetes Engine:
